Dear Nathaniel

CleanCo Queensland welcomes the opportunity to submit an Expression of Interest in Powerlink Queensland's Request for Network Support and Control Ancillary Services (NSCAS) in South East Queensland to address the reactive power absorption shortfall in that area.

CleanCo Queensland propose using Wivenhoe Pump/Hydro Power Station (WPS) to provide the required services. The proposal sees WPS operating in either synchronous condenser mode, export mode or import mode to provide reactive power absorption as required. [REDACTED]

[REDACTED]

I look forward to discussing this opportunity further and to supporting Powerlink in providing a stable network for Queensland.
