

Health, Safety and Environment Policy

At Powerlink, our commitment is to the safety and wellbeing of our people, customers, contractors and communities, and to the prevention or minimisation of harm to the environment.

We will work together to achieve our health, safety and environmental (HSE) commitments through our focus areas:

Empowered People and Learning

We trust our people. They are empowered to use their expertise and create improvements in their work. We take every opportunity to learn, share and continuously improve how we work.

Healthy and Engaged Workforce

We lead with genuine care for our people and want everyone to go home safe and well every day. We create a constructive and engaging workplace so that our people can thrive. We enable our people to make positive health and wellness choices at work and at home.

Agile Delivery

We are constantly adapting our systems to respond to the changing requirements and risks of our work. Our systems are relevant for our people to use. We focus on improving the effectiveness of critical processes and controls in our work, and build resilience into our operations aligned with our commitment to our people, customers, contractors, communities and the environment.

Sustainable Decisions

Our decisions are informed by data and insights. We consider the impacts and opportunities of our decisions on the environment and the reliability of our network. We build collaborative partnerships to create a positive impact in the community and for our people.

Powerlink systemically monitors its compliance obligations and business requirements. It has systems in place to develop, resource, monitor and make continuous improvement to progress its health, safety and environmental commitments and objectives. This includes planning, design, construction, operation and maintenance of an electrically safe network.

The HSE Policy will be delivered through HSE Strategy 21++ and HSE Governance and Policy Standard requirements.

Approved by the Board on 30/03/2022
