

WORKS NOTICE | JANUARY 2024

Hughenden workforce accommodation and facilities

January Construction Update.

Latest Update

As we kick off the new year, the CopperString team is making great progress at the Hughenden WAF site. The last of the accommodation modules were delivered before Christmas, and staff and contractors are now full steam ahead, preparing for operations in mid to late 2025.

Timing

To ensure the team can continue their work efficiently while managing the extreme heat, some early morning activities will be taking place. These include concrete pours, with some works commencing from **5:30 AM**, starting **28th January for approximately two to three months**. While every effort will be made to minimise disruptions, we appreciate your understanding as we prioritise safety and efficiency in these conditions.

What's new?

We are excited to announce the launch of a new project exclusive charter flight service operated by Skytrans, flying in our personnel to Hughenden on a weekly basis. The first flight successfully commenced in early January, with potential for the services to ramp up as the project continues.
