COMMUNITY NOTICE | JULY 2025

Kamerunga to Woree Replacement Project

Dear Resident,

We are writing to advise that Powerlink has released the Final Corridor and Site Selection Report (CSSR) for the Kamerunga to Woree Replacement Project.

The project includes:

- a new substation in Barron to replace the existing Kamerunga Substation
- a replacement overhead line between Kamerunga to Redlynch
- an underground transmission cable, situated in a new corridor, between Redlynch to Woree to replace the current overhead transmission line.

This Final CSSR outlines the work undertaken to identify the final corridor for both the replacement overhead transmission line and underground cable, and a final site for the new substation.

Powerlink released the Draft Corridor and Site Selection Report in September 2024 for an eight-week comment period. Where appropriate, feedback has been used to inform the final corridor and site selection.

Please visit our project page by scanning the QR code at the bottom of this notification to view the Final CSSR.

Geotechnical investigations

Geotechnical investigations were originally planned for Q3/Q4 2025; however, they will now be delivered mid-2026.

This revised timeframe will support the delivery of any additional planning and design work required prior to construction commencing in 2027.

Targeted engagement with nearby residents and community members along the planned works areas will be carried out before activities commence.

Next steps

Following release of the Final CSSR, additional detailed technical studies and ongoing engagement will help to determine the final transmission line design within the corridor. These will include:

- social and economic impact assessment
- environment, heritage and planning review
- economic assessment
- land, geology and soils testing.

KEEPING YOU INFORMED

We remain committed to keeping residents and the community informed of our activities and the timings of works.

Please visit our project page for the latest information and to register for email updates.

If you have questions or would like further information, please contact our project team on 07 4034 7601 or kamerunga-woree@powerlink.com.au.
