### Notes

1. The system strength unit prices shown in this schedule have been determined in accordance with Chapter 6A of the National Electricity Rules and Powerlink's Approved Pricing Methodology. In accordance with the rules, Powerlink's 2026/27 SSUPs reflect the 2025/26 SSUPs indexed by the Consumer Price Index (CPI) of 3.8%.
2. This schedule provides the unit price in \$/MVA/year for the calculation of prescribed system strength charges. These charges apply to eligible connecting parties who choose not to remediate their full system strength impact on the network.
3. The relevant system strength node, system strength quantity (MVA) and locational factor information required to calculate prescribed system strength charges will be confirmed by Powerlink through the connection enquiry and application to connect processes.
4. Prices associated with other prescribed transmission services, such as transmission use of system, and non-prescribed services are not included in this schedule.
5. For more information on the system strength charging framework, please see Powerlink's System Strength Charging information sheet.
