WORKS NOTICE | JULY 2026

Ingham South Substation Reinvestment Project

NOTIFICATION OF UPCOMING WORKS

Dear resident,

We are writing to advise you of upcoming works near your property as part of the Ingham South Substation Reinvestment Project.

PROJECT OVERVIEW

The Ingham South Substation is an important part of Powerlink's 132kV transmission network helping to supply electricity to the wider Ingham area and Ergon Energy's 66kV Ingham Substation.

Construction works are required at our Ingham South Substation to upgrade critical equipment, install a new control building designed to Q200 flood levels and ensure a safe, secure and reliable electricity supply into the future.

The project is being delivered in stages over a 3-year period with all works scheduled for completion by **November 2028**.

The works will not result in any planned electricity outages, and all construction activities will be undertaken on Powerlink-owned land. We will keep you updated on works and timings as the project progresses.

WHAT TO EXPECT DURING THE WORKS

The first stage of works will commence from **Monday 3 August 2026** and will continue through to **mid-December 2026**.

As some construction activities may take up to 12 hours and must continue once they start, work crews will be onsite between **6.00am and 6.00pm, Monday to Sunday**.

We do not expect any major works to be performed outside of these hours and will inform you in advance of any changes to these times.

Various machinery will be used for the works including forklifts, excavators, cranes and other heavy vehicles.

We will work to minimise noise and dust impacts wherever possible, including by limiting some construction activities on Sundays and watering work areas and access tracks.

Access to your property will be maintained at all times, and work crews will use existing roads and access road tracks where practicable.

We thank you for your patience as we deliver these important works.
