

WORKS NOTICE

Gladstone Project Stage 1: Calvale to Calliope River Transmission Reinforcement Project

Notification of works

Calvale to Calliope River Substation initial clearing and site preparation

August 2026 to mid-2027

Powerlink has engaged BMD Constructions to deliver the Gladstone Project Stage 1: Calvale to Calliope River Transmission Line Reinforcement Project. These works are designed to support the safety, reliability and security of electricity supply in the region through a broader program of transmission network upgrades.

Works will be constructed primarily beside existing transmission lines between the Calvale Substation (near Callide Power Station) and the Calliope River Substation (near Gladstone) and will include upgrades at both substations.

ABOUT THE WORKS

BMD will prepare the transmission line easement and access tracks for the construction of a new transmission line. Following extensive environmental surveys and in line with state and federal approvals, BMD's scope of work includes vegetation clearing, earthworks, construction of access tracks and tower pads, drainage improvements and site reinstatement.

Works are scheduled to begin in mid-August 2026 at the Calvale Substation and progress east towards Calliope River Substation, with completion expected in mid-2027, weather permitting.

WHAT TO EXPECT

You may notice increased movements of light vehicles, trucks and heavy machinery on local roads, as well as increased noise and dust near access tracks.

Most activities will occur within the easement. However, temporary changes to local traffic conditions may be required to support vehicle and machinery movements. Traffic controls and signage will be in place where necessary.

BMD will implement biosecurity management protocols, dust suppression, noise management measures and other environmental controls to minimise impacts on nearby properties, road users and the local community.

Impacted residents will continue to be notified of specific activities in their area as works progress.

TIMING

Works will occur between 6.30am and 6.30pm seven days per week.

FURTHER INFORMATION

Updates will be provided as works progress.

For more information, please contact BMD Constructions on 1800 531 550 - this line will be monitored during working hours. Alternatively, email the project at cqprojects@powerlink.com.au, scan the QR code or visit the project Community Hub at engage.powerlink.com.au/central-queensland.

Thank you for your patience while we deliver this work.
