

Theodore Wind Farm Connection Project

POWERLINK QUEENSLAND

About the project

Powerlink has been engaged by RWE Renewables Australia (RWE) to connect their proposed Theodore Wind Farm to the electricity grid.

The connection project will include building a new double circuit 275kV transmission line from the proposed Castle Creek Substation within the Theodore Wind Farm, to the proposed future Powerlink substation at Mt Benn near Banana (which forms part of the Banana Range Wind Farm Connection Project - currently in the planning phase).

Project update

Following engagement with RWE, changes to project planning and delivery assumptions have led to Powerlink undertaking a review of the timing of the connection project. This will require some activities to occur later than previously expected.

We understand changes to project timing may create uncertainty.

The project remains active and we will continue working with our project partners and key stakeholders while project planning activities are considered.

We remain committed to keeping stakeholders updated on the project and thank you for your ongoing patience as planning activities continue.

Keep updated on our activities

To stay up to date on our projects and activities in the region, scan the QR code or visit our engagement Community Hub at engage.powerlink.com.au/cq.

The Community Hub includes a map, latest news and copies of our Central Queensland Transmission Update newsletter.

In the coming months, our Powerlink team will again be hosting pop-up information sessions across the region to share the latest Transmission Update newsletter and meet with local communities.

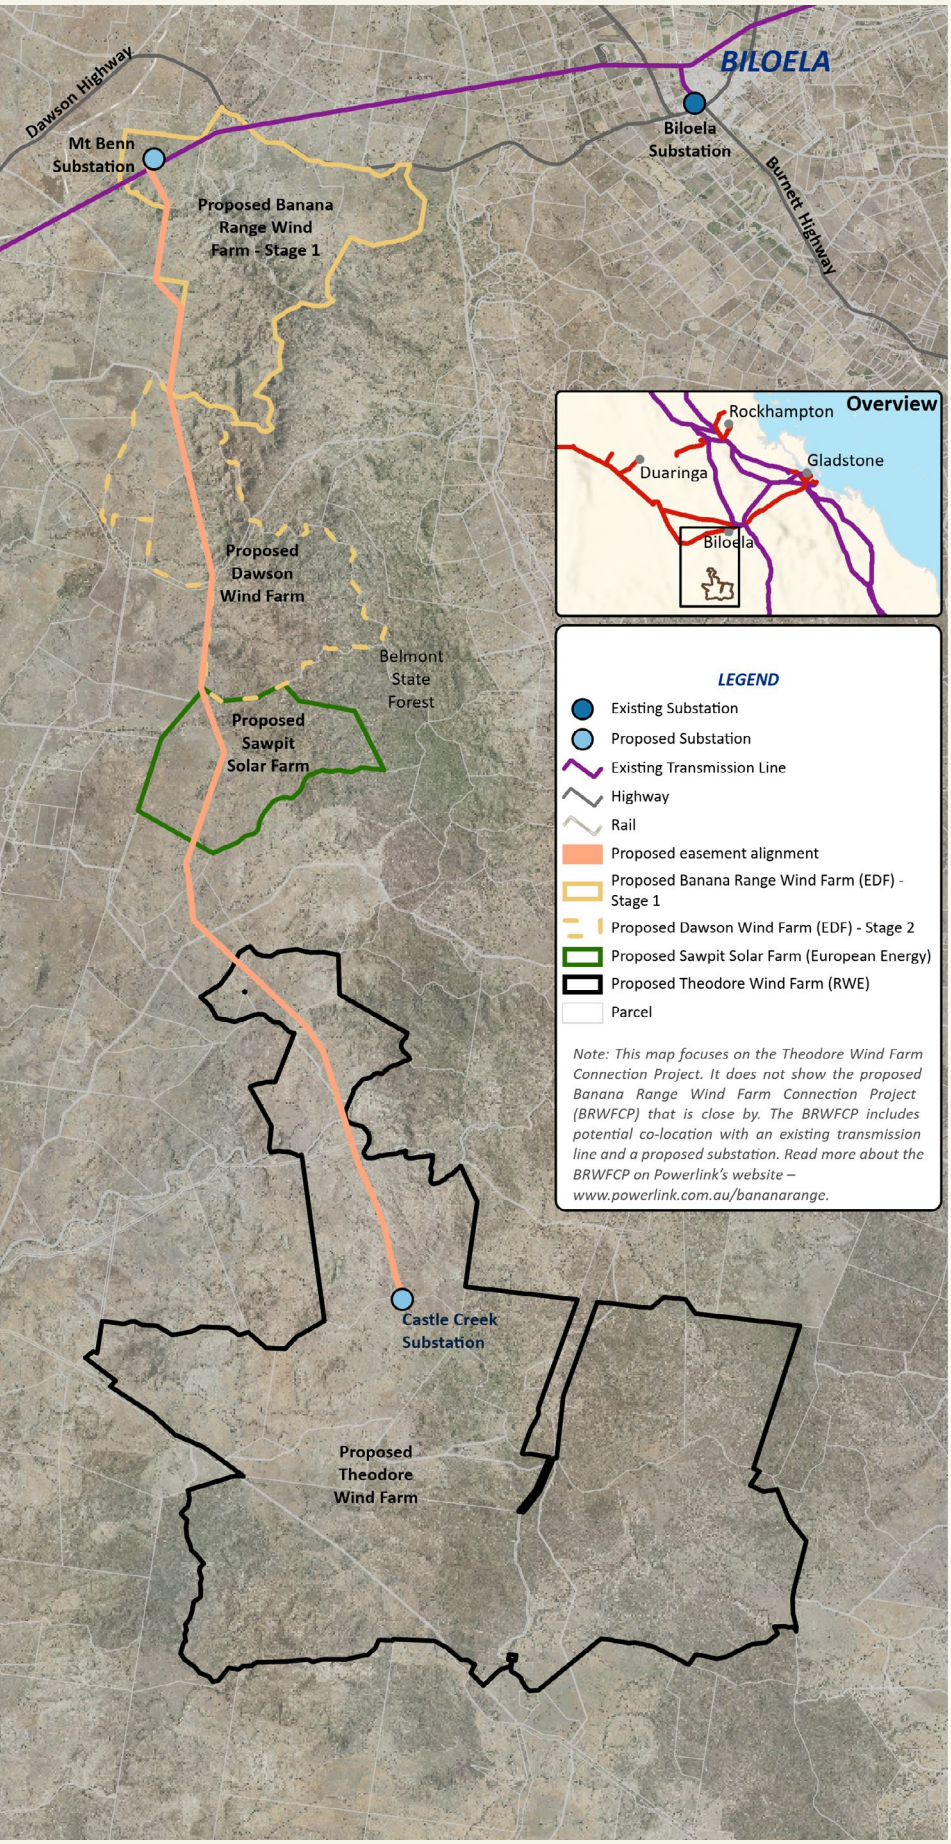

Details about these pop-ups will be advertised on the Community Hub.

Powerlink acknowledges the Traditional Owners and their custodianship of the lands and waters of Queensland and in particular, the lands on which we operate. We pay our respect to their Ancestors, Elders and knowledge holders and recognise their deep history and ongoing connection to Country.

Powerlink QUEENSLAND

SAFE FOR LIFE
Everyone. Everywhere. Everyday.

About Powerlink

Powerlink Queensland is a leading Australian provider of electricity transmission services, focused on delivering a safe, reliable, affordable and sustainable network for our customers.

Our network extends 1,700 kilometres from Cairns to the New South Wales border and comprises 15,697 circuit km of transmission lines and 156 substations.

Our purpose is to connect Queenslanders to a world-class energy future, providing electricity to more than five million Queenslanders and 241,000 businesses.

Further information

If you have any questions about the Theodore Wind Farm Connection Project, please contact our project team by phone on 07 3898 4919 or emailing theodore@powerlink.com.au.

Landholders along the final easement alignment are welcome to contact our Landholder Relations Team by calling 1800 635 369, or emailing landholderrelations@powerlink.com.au.

Please scan the QR code or visit powerlink.com.au/theodore to access our project webpage.

Contact RWE directly for any enquiries about their wind farm project at au.rwe.com.
